

## CLAIMS

What is claimed is:

1. A method for reporting FCT/STFC data to a customer in response to an electronic purchase order from the customer, comprising the steps of:

5 (1) receiving the electronic purchase order;

(2) performing a predefined FCT computation procedure to compute for a set of FCT data based on the received electronic purchase order;

(3) performing a predefined STFC computation procedure to compute for a set of STFC data based on the received electronic purchase order; and

10 (4) posting the FCT/STFC data on a database server connected to a network system, so as to allow the customer to gain access to the FCT/STFC data posted on the database server by linking to the database server via the network system.

2. The method of claim 1, wherein in said step (1), the electronic purchase order is received by an EDI platform.

15 3. The method of claim 1, wherein in said step (2), the predefined FCT computation procedure is performed by an SAP platform.

4. The method of claim 1, wherein in said step (3), the predefined STFC computation procedure is performed by an SQL server.

5. The method of claim 1, wherein in said step (4), the network system is Internet,  
20 while the database server is a WWW server.

6. A method for reporting FCT/STFC data to a customer in response to an electronic purchase order from the customer, comprising the steps of:

- (1) receiving the electronic purchase order via an EDT platform;
- (2) performing a predefined FCT computation procedure on an SAP platform to compute for a set of FCT data based on the received electronic purchase order;
- (3) performing a predefined STFC computation procedure on an SQL server to compute for a set of STFC data based on the received electronic purchase order; and
- (4) posting the FCT/STFC data on a WWW server connected to Internet, so as to allow the customer to gain access to the FCT/STFC data posted on the WWW server by linking to the WWW server via Internet.

7. An electronic business transaction system for reporting FCT/STFC data to a customer in response to an electronic purchase order from the customer;

the electronic business transaction system comprising:

- (a) an EDI platform for receiving the electronic purchase order;
- (b) an SAP platform for performing a predefined FCT computation procedure to compute for a set of FCT data based on the received electronic purchase order;
- (c) an SQL server for performing a predefined STFC computation procedure to compute for a set of STFC data based on the received electronic purchase order; and
- (d) a WWW server, on which the FCT/STFC data are posted, for serving the FCT/STFC data through Internet to the customer.
